Challenges

- **Government:** develop and implement policies and required financial support for:
 - Appropriate shares of VALEC's capital investment on each line and any operating support as required
 - Regulation of access charges within the objectives established for VALEC
 - Oversight of neutral access and dispatching
 - Oversight of VALEC's safety
- **VALEC:** develop a specific approach based on your traffic mix, your lines and economic and financial objectives to:
 - Implement capacity planning and management
 - Establish access charges
 - Ensure neutral access and dispatching
 - Provide efficient operation
 - Guarantee safety
